FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended March 31, 2021

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number: 001-39417

NEWHOLD INVESTMENT CORP.
(Exact name of registrant as specified in its charter)

Delaware

(State or other jurisdiction of
incorporation or organization)

84-4473840

(I.R.S. Employer
Identification Number)

**950 McCarty Street, Building A
Houston, TX**

(Address of principal executive offices)

77029

(Zip Code)

Registrant's telephone number, including area code: **(212) 653 0153**

Not applicable

(Former name or former address, if changed since last report)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted and pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See definitions of "large accelerated filer," "accelerated filer," "smaller reporting company" and "emerging growth company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer
Non-accelerated filer

Accelerated filer
Smaller reporting company
Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Trading Symbol(s)	Name of each exchange on which registered
Class A Common Stock, par value \$0.0001 per share	HCAC	The NASDAQ Stock Market LLC
Redeemable Warrants, each whole warrant exercisable for one share of Class A Common Stock at an exercise price of \$11.50	HCACW	The NASDAQ Stock Market LLC
Units, each consisting of one share of Class A Common Stock and three-quarters of one Redeemable Warrant	HCACU	The NASDAQ Stock Market LLC

As of May 1, 2021, there were 17,250,000 shares of the Company's class A common stock, and 4,312,500 of its class B common stock issued and outstanding.

NEWHOLD INVESTMENT CORP.
Notes to Condensed Financial Statements
(unaudited)

NOTE 1 – DESCRIPTION OF ORGANIZATION AND BUSINESS OPERATIONS*Organization and General:*

NewHold Investment Corp. (the “Company”) was incorporated in Delaware on January 24, 2020 as NewHold Industrial Corp. and on February 14, 2020 changed its name to NewHold Investment Corp. The Company was formed for the purpose of effecting a merger, capital stock exchange, asset acquisition, stock purchase, reorganization or similar business combination with one or more businesses (a “Business Combination”). The Company is an “emerging growth company,” as defined in Section 2(a) of the Securities Act of 1933, as amended, or the “Securities Act,” as modified by the Jumpstart Our Business Startups Act of 2012 (the “JOBS Act”).

As of March 31, 2021, the Company had not commenced any operations. All activity for the period from January 24, 2020 (date of inception) to March 31, 2021 relates to the Company’s formation and the initial public offering (“Public Offering”) described below, and subsequent to the Public Offering, searching for a potential business combination. The Company will not generate any operating revenues until after completion of its initial Business Combination, at the earliest. The Company expects to generate non-operating income in the form of interest income on the proceeds derived from the Public Offering.

All dollar amounts are rounded to the nearest thousand dollars.

Sponsor and Financing:

The Company’s sponsor is NewHold Industrial Technology Holdings LLC, a Delaware limited liability company (the “Sponsor”). The registration statement for the Public Offering (as described in Note 3) was declared effective by the United States Securities and Exchange Commission (the “SEC”) on July 30, 2020. The Company intends to finance a Business Combination with proceeds from the \$172,500,000 Public Offering (Note 4) and a \$5,700,000 Private Placement (as defined in Note 4), net of expenses. Upon the closing of the Public Offering and the Private Placement, \$172,500,000 was deposited in a trust account (the “Trust Account”).

The Trust Account:

The funds in the Trust Account can be invested only in U.S. government treasury bills with a maturity of one hundred and eighty five (185) days or less or in money market funds meeting certain conditions under Rule 2a-7 under the Investment Company Act of 1940 which invest only in direct U.S. government obligations. Funds will remain in the Trust Account until the earlier of (i) the consummation of its initial Business Combination or (ii) the distribution of the Trust Account as described below. The remaining funds outside the Trust Account may be used to pay for business, legal and accounting due diligence on prospective acquisition targets and continuing general and administrative expenses.

The Company's amended and restated certificate of incorporation provides that, other than the withdrawal of interest to pay tax obligations and up to \$250,000 per year for working capital purposes, if any, (less up to \$100,000 of interest to pay dissolution expenses), none of the funds held in the Trust Account will be released until the earliest of: (a) the completion of the initial Business Combination, (b) the redemption of any public shares properly submitted in connection with a stockholder vote to amend the Company's amended and restated certificate of incorporation (i) to modify the substance or timing of the ability of holders of the public shares to seek redemption in connection with our initial business combination or the Company's obligation to redeem 100% of the public shares if the Company does not complete the initial Business Combination within 24 months from the closing of the Public Offering, August 4, 2022, or (ii) with respect to any other provision relating to stockholders' rights or pre-Business Combination activity, and (c) the redemption of the public shares if the Company is unable to complete the initial Business Combination within 24 months from the closing of the Public Offering, subject to applicable law. The proceeds deposited in the Trust Account could become subject to the claims of creditors, if any, which could have priority over the claims of the Company's public stockholders.

Business Combination:

The Company's management has broad discretion with respect to the specific application of the net proceeds of the Public Offering, although substantially all of the net proceeds of the Public Offering are intended to be generally applied toward consummating a Business Combination with a Target Business. As used herein, "Target Business" is one or more target businesses that together have a fair market value equal to at least 80% of the balance in the Trust Account (less deferred underwriting commissions and any taxes payable on interest earned) at the time of signing a definitive agreement in connection with the Company's initial Business Combination. There is no assurance that the Company will be able to successfully effect a Business Combination.

The Company, after signing a definitive agreement for a Business Combination, will either (i) seek stockholder approval of the Business Combination at a meeting called for such purpose in connection with which stockholders may seek to redeem their shares, regardless of whether they vote for or against the Business Combination, for cash equal to their pro rata share of the aggregate amount then on deposit in the Trust Account as of two business days prior to the consummation of the initial Business Combination, including interest but less taxes payable and amounts released for working capital, or (ii) provide stockholders with the opportunity to have their shares redeemed by the Company by means of a tender offer (and thereby avoid the need for a stockholder vote) for an amount in cash equal to their pro rata share of the aggregate amount then on deposit in the Trust Account as of two business days prior to the consummation of the initial Business Combination, including interest but less taxes payable and amounts released to the Company for working capital. The decision as to whether the Company will seek stockholder approval of the Business Combination or will allow stockholders to sell their shares in a tender offer will be made by the Company, solely in its discretion, and will be based on a variety of factors such as the timing of the transaction and whether the terms of the transaction would otherwise require the Company to seek stockholder approval unless a vote is required by the rules of the Nasdaq Capital Market. If the Company seeks stockholder approval, it will complete its Business Combination only if a majority of the outstanding shares of Class A and Class B common stock voted are voted in favor of the Business Combination. However, in no event will the Company redeem its public shares in an amount that would cause its net tangible assets to be less than \$5,000,001 upon consummation of a Business Combination. In such case, the Company would not proceed with the redemption of its public shares and the related Business Combination, and instead may search for an alternate Business Combination.

If the Company holds a stockholder vote or there is a tender offer for shares in connection with a Business Combination, a public stockholder will have the right to redeem its shares for an amount in cash equal to its pro rata share of the aggregate amount then on deposit in the Trust Account as of two business days prior to the consummation of the initial Business Combination, including interest but less taxes payable and amounts released to the Company for working capital. As a result, such shares of Class A common stock will be recorded at redemption amount and classified as temporary equity upon the completion of the Public Offering, in accordance with FASB ASC 480, "Distinguishing Liabilities from Equity." In August 2020, the Company deposited an aggregate of \$172,500,000 from the proceeds of the Public Offering, including the underwriters' exercise of their overallotment option and the sale of \$5,700,000 for the Private Placement Warrants, net of expenses.

The Company will have 24 months (until August 4, 2022) from the closing date of the Public Offering to complete its initial Business Combination. If the Company does not complete a Business Combination within this period of time, it shall (i) cease all operations except for the purposes of winding up; (ii) as promptly as reasonably possible, but not more than ten business days thereafter subject to lawfully available funds therefor, redeem 100% of the public shares of Class A common stock for a per share pro rata portion of the Trust Account, including interest, but less taxes payable and amounts released for working capital (less up to \$100,000 of such net interest to pay dissolution expenses) and (iii) as promptly as possible following such redemption, dissolve and liquidate the balance of the Company's net assets to its creditors and remaining stockholders, as part of its plan of dissolution and liquidation. The initial stockholders have entered into letter agreements with us, pursuant to which they have waived their rights to participate in any redemption with respect to their initial shares; however, if the initial stockholders or any of the Company's officers, directors or affiliates acquire shares of Class A common stock in or after the Public Offering, they will be entitled to a pro rata share of the Trust Account upon the Company's redemption or liquidation in the event the Company does not complete a Business Combination within 24 months from the closing of the Public Offering.

In the event of such distribution, it is possible that the per share value of the residual assets remaining available for distribution (including Trust Account assets) will be less than the price per Unit in the Public Offering.

NOTE 2 – MERGER AGREEMENT

On March 5, 2021, NewHold Investment Corp., (the "Company"), entered into an Agreement and Plan of Merger (the "Merger Agreement") by and among the Company, NHIC Sub Inc., a Delaware corporation and a wholly owned subsidiary of the Company ("Merger Sub"), and Evolv Technologies, Inc. dba Evolv Technology, Inc., a Delaware corporation ("Evolv"). Pursuant to the terms of the Merger Agreement, a business combination between NewHold and Evolv will be effected through the merger of Merger Sub with and into Evolv, with Evolv surviving the merger as a wholly owned subsidiary of the Company (the "Merger"). The Board of Directors of the Company (the "Board") has unanimously (i) approved and declared advisable the Merger Agreement, the Merger and the other transactions contemplated thereby and (ii) resolved to recommend approval of the Merger Agreement and related matters by the stockholders of The Company.

Evolv is engaged in the business of providing artificial intelligence touchless security screening. Evolv is based in Waltham, Massachusetts.

More complete information about the Merger Agreement and related Support Agreement, Amended and Restated Insider Letter Agreement, form of Subscription Agreement and Stockholder Agreement are filed with the Current Report on Form 8-K filed on March 8, 2021.

NOTE 3 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation:

The accompanying unaudited condensed interim financial statements of the Company are presented in U.S. dollars and in conformity with accounting principles generally accepted in the United States of America (“GAAP”) pursuant to the rules and regulations of the SEC and reflect all adjustments, consisting only of normal recurring adjustments, which are, in the opinion of management, necessary for a fair presentation of the financial position as of March 31, 2021, and the results of operations and cash flows for the periods presented. Certain information and disclosures normally included in financial statements prepared in accordance with GAAP have been omitted pursuant to such rules and regulations. Interim results are not necessarily indicative of results for a full year.

The accompanying unaudited condensed interim financial statements should be read in conjunction with the Company’s audited financial statements and notes thereto included in the Company’s final prospectus dated July 28, 2020, as well as the Company’s Annual Report, Amendment #1 on Form 10-K/A filed with the SEC on May 14, 2021.

Emerging Growth Company

Section 102(b)(1) of the JOBS Act exempts emerging growth companies from being required to comply with new or revised financial accounting standards until private companies (that is, those that have not had a Securities Act registration statement declared effective or do not have a class of securities registered under the Exchange Act) are required to comply with the new or revised financial accounting standards. The JOBS Act provides that a company can elect to opt out of the extended transition period and comply with the requirements that apply to non-emerging growth companies but any such an election to opt out is irrevocable. The Company has elected not to opt out of such extended transition period which means that when an accounting standard is issued or revised and it has different application dates for public or private companies, the Company, as an emerging growth company, can adopt the new or revised standard at the time private companies adopt the new or revised standard. This may make comparison of the Company’s financial statements with another public company which is neither an emerging growth company nor an emerging growth company which has opted out of using the extended transition period difficult or impossible because of the potential differences in accounting standards used.

Cash and Cash Equivalents:

The Company considers all highly liquid instruments with original maturities of three months or less when acquired, to be cash equivalents. The Company had no cash equivalents at March 31, 2021.

Deferred Offering Costs:

The Company complies with the requirements of the FASB ASC 340-10-S99-1 and SEC Staff Accounting Bulletin (SAB) Topic 5A — “Expenses of Offering.” Costs incurred in connection with preparation for the Offering were approximately \$9,986,000, including underwriters’ discount paid and deferred of approximately \$9,488,000. Such costs were allocated among the equity and warrant liability components based on the relative fair value of the warrants and approximately \$9,596,000 has been charged to equity for the equity components and approximately \$390,000 has been charged to other expense for the warrant liability components upon completion of the Public Offering.

Redeemable Common Stock:

As discussed in Note 3, all of the 17,250,000 public shares sold as part of Units in the Public Offering contain a redemption feature which allows for the redemption of public shares if the Company holds a stockholder vote or there is a tender offer for shares in connection with a Business Combination. In accordance with FASB ASC 480, redemption provisions not solely within the control of the Company require the security to be classified outside of permanent equity. Ordinary liquidation events, which involve the redemption and liquidation of all of the entity’s equity instruments, are excluded from the provisions of FASB ASC 480. Although the Company did not specify a maximum redemption threshold, its charter provides that in no event will it redeem its public shares in an amount that would cause its net tangible assets (stockholders’ equity) to be less than \$5,000,001 upon the closing of a Business Combination.

The Company recognizes changes in redemption value immediately as they occur and adjusts the carrying value of the securities at the end of each reporting period. Increases or decreases in the carrying amount of redeemable common stock are affected by adjustments to additional paid-in capital. Accordingly, at March 31, 2021 and December 31, 2020, 13,669,161 and 14,077,350, respectively, of the 17,250,000 public shares were classified outside of permanent equity.

Net Income (Loss) per Share

Net income (loss) per common share is computed by dividing net income (loss) applicable to common stockholders by the weighted average number of shares of common stock outstanding for the period. The Company has not considered the effect of the warrants sold in the Public Offering and Private Placement to purchase an aggregate of 14,325,000 shares of Class A common stock in the calculation of diluted income (loss) per share, since their inclusion would be anti-dilutive under the treasury stock method. As a result, diluted income (loss) per common share is the same as basic loss per common share for the period.

The Company’s statement of operations includes a presentation of income (loss) per share for common stock subject to redemption in a manner similar to the two-class method of income (loss) per share. Net income (loss) per share, basic and diluted for Class A common stock is calculated by dividing the interest income earned on the funds in the Trust Account, net of income tax expense and franchise tax expense, by the weighted average number of shares of Class A common stock outstanding since their original issuance. Net income (loss) per common share, basic and diluted, for shares of Class B common stock is calculated by dividing the net income (loss), less income attributable to Class A common stock, by the weighted average number of shares of Class B common stock outstanding for the period. Net income (loss) available to each class of common stockholders is as follows for the three months ended March 31, 2021 and for the period from January 24, 2020 (date of inception) to March 31, 2020:

	Three months Ended March 31, 2021	For the Period From January 24, 2020 (date of inception) to March 31, 2020
Net income available to Class A common stockholders:		
Interest income	\$ 19,000	\$ -
Less: Income and franchise taxes	(19,000)	-
Net income attributable to Class A common stockholders	<u>\$ -</u>	<u>\$ -</u>
Net income available to Class B common stockholders:		
Net loss	\$ (4,082,000)	\$ (2,000)
Less: amount attributable to Class A common stockholders	-	-

Concentration of Credit Risk:

Financial instruments that potentially subject the Company to concentrations of credit risk consist of cash accounts in a financial institution, which at times, may exceed the Federal depository insurance coverage of \$250,000. The Company has not experienced losses on these accounts and management believes the Company is not exposed to significant risks on such accounts.

Financial Instruments:

The fair value of the Company's assets and liabilities, which qualify as financial instruments under Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC 820"), "Fair Value Measurements and Disclosures," approximates the carrying amounts represented in the financial statements.

Use of Estimates:

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires the Company's management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements. Making estimates requires management to exercise significant judgment. It is at least reasonably possible that the estimate of the effect of a condition, situation or set of circumstances that existed at the date of the financial statement, which management considered in formulating its estimate, could change in the near term due to one or more future confirming events. One of the more significant accounting estimates included in these financial statements is the determination of the fair value of the warrant liability. Such estimates may be subject to change as more current information becomes available and accordingly the actual results could differ significantly from those estimates.

Income Taxes:

The Company follows the asset and liability method of accounting for income taxes under FASB ASC, 740, "Income Taxes." Deferred tax assets and liabilities are recognized for the estimated future tax consequences attributable to differences between the financial statements carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that included the enactment date. Valuation allowances are established, when necessary, to reduce deferred tax assets to the amount expected to be realized.

The Company's currently taxable income consists of interest income on the Trust Account net of taxes. The Company's general and administrative costs are generally considered start-up costs and are not currently deductible. During the three months ended March 31, 2021 and the period from January 24, 2020 (date of inception) to March 31, 2020, the Company recorded income tax expense of approximately \$-0- for both periods, respectively, related to interest income earned on the Trust Account net of taxes. The Company's effective tax rate for the three months ended March 31, 2021 and the period from January 24, 2020 (date of inception) to March 31, 2020 was approximately -0-%, for both periods which differs from the expected income tax rate due to the start-up costs (discussed above) which are not currently deductible as well as business combination and warrant liability charges or credits which may not be deductible, and the low level of interest income. At March 31, 2021 and December 31, 2020, the Company has a deferred tax asset of approximately \$550,000 and \$200,000, respectively, primarily related to start-up and Business Combination costs. Management has determined that a full valuation allowance of the deferred tax asset is appropriate at this time.

FASB ASC 740 prescribes a recognition threshold and a measurement attribute for the financial statement recognition and measurement of tax positions taken or expected to be taken in a tax return. For those benefits to be recognized, a tax position must be more-likely-than-not to be sustained upon examination by taxing authorities. There were no unrecognized tax benefits as of March 31, 2021. The Company recognizes accrued interest and penalties related to unrecognized tax benefits as income tax expense. No amounts were accrued for the payment of interest and penalties at March 31, 2021. The Company is currently not aware of any issues under review that could result in significant payments, accruals or material deviation from its position. The Company is subject to income tax examinations by major taxing authorities since inception.

Warrant Liability

The Company accounts for warrants as either equity-classified or liability-classified instruments based on an assessment of the warrant's specific terms and applicable authoritative guidance FASB ASC 480, Distinguishing Liabilities from Equity ("ASC 480") and ASC 815, Derivatives and Hedging ("ASC 815"). The assessment considers whether the warrants are freestanding financial instruments pursuant to ASC 480, meet the definition of a liability pursuant to ASC 480, and whether the warrants meet all of the requirements for equity classification under ASC 815, including whether the warrants are indexed to the Company's own shares, among other conditions for equity classification. This assessment, which requires the use of professional judgment, is conducted at the time of warrant issuance and as of each subsequent quarterly period end date while the warrants are outstanding.

For issued or modified warrants that meet all of the criteria for equity classification, the warrants are required to be recorded as a component of additional paid-in capital at the time of issuance. For issued or modified warrants that do not meet all the criteria for equity classification, the warrants are required to be recorded as liabilities at their initial fair value on the date of issuance, and at fair value in each balance sheet date thereafter. Changes in the estimated fair value of the warrants are recognized as a non-cash gain or loss on the statements of operations. Costs associated with issuing the warrants accounted for as liabilities are charged to operations when the warrants are issued. The fair value of the public warrants and the private placement warrants were initially estimated using a Monte Carlo simulation approach. Following the separate trading of the Company's common stock and public warrants, the private placement warrants fair values were estimated using a Black-Scholes-Merton approach.

Recent Accounting Pronouncements:

In August 2020, the FASB issued Accounting Standards Update ("ASU") No. 2020-06, *Debt -- Debt with Conversion and Other Options (Subtopic 470-20) and Derivatives and Hedging -- Contracts in Entity's Own Equity (Subtopic 815-40): Accounting for Convertible Instruments and Contracts in an Entity's Own Equity* ("ASU 2020-06"), which simplifies accounting for convertible instruments by removing major separation models required under current GAAP. The ASU also removes certain settlement conditions that are required for equity-linked contracts to qualify for the derivative scope exception, and it simplifies the diluted earnings per share calculation in certain areas. The Company adopted ASU 2020-06 on January 1, 2021. Adoption of the ASU did not impact the Company's financial position, results of operations or cash flows.

The Company's management does not believe that any other recently issued, but not yet effective, accounting standards if currently adopted would have a material effect on the accompanying financial statements.

Subsequent Events:

Management has evaluated subsequent events to determine if events or transactions occurring after the date of the financial statements but before the financial statements were available to be issued require potential adjustment to or disclosure in the financial statements and has concluded that all such events that would require adjustment or disclosure have been recognized or disclosed.

NOTE 4 – PUBLIC OFFERING

In August 2020, the Company closed on the Public Offering, including the full exercise of the underwriters' overallotment option, of an aggregate 17,250,000 units at a price of \$10.00 per unit (the "Units"). Each Unit consists of one share of the Company's Class A common stock, \$0.0001 par value and one-half of one redeemable warrant (the "Warrants"). Each whole Warrant offered in the Public Offering is exercisable to purchase one share of our Class A common stock for \$11.50 per share. Only whole Warrants may be exercised. Under the terms of the warrant agreement, the Company has agreed to use its best efforts to file a new registration statement under the Securities Act, following the completion of the Company's initial Business Combination. No fractional shares will be issued upon exercise of the Warrants. If, upon exercise of the Warrants, a holder would be entitled to receive a fractional interest in a share, the Company will, upon exercise, round down to the nearest whole number the number of shares of Class A common stock to be issued to the Warrant holder. Each Warrant will become exercisable on the later of 30 days after the completion of the Company's initial Business Combination or 12 months from the closing of the Public Offering and will expire five years after the completion of the Company's initial Business Combination or earlier upon redemption or liquidation. However, if the Company does not complete its initial Business Combination on or prior to the 24-month period allotted to complete the Business Combination, the Warrants will expire at the end of such period. If the Company is unable to deliver registered shares of Class A common stock to the holder upon exercise of a Warrant during the exercise period, there will be no net cash settlement of these Warrants and the Warrants will expire worthless, unless they may be exercised on a cashless basis in the circumstances described in the warrant agreement. Once the Warrants become exercisable, the Company may redeem the outstanding Warrants in whole and not in part at a price of \$0.01 per Warrant upon a minimum of 30 days' prior written notice of redemption, only in the event that the last sale price of the Company's shares of Class A common stock equals or exceeds \$18.00 per share for any 20 trading days within the 30-trading day period ending on the third trading day before the Company sends the notice of redemption to the Warrant holders.

In addition, if the Company issues additional shares of Class A common stock or equity-linked securities for capital raising purposes in connection with the closing of its initial Business Combination at an issue price or effective issue price of less than \$9.20 per share of Class A common stock (with such issue price or effective issue price to be determined in good faith by the Company's board of directors and, in the case of any such issuance to the initial stockholders or their affiliates, without taking into account any Founder Shares held by them, as applicable, prior to such issuance) (the "newly issued price"), the exercise price of the Warrants and the Private Placement Warrants (as defined below) will be adjusted (to the nearest cent) to be equal to 115% of the newly issued price.

The Company paid an underwriting discount of 2.0% of the per Unit price to the underwriters at the closing of the Public Offering (an aggregate fee of \$3,450,000 including the exercise of the underwriter's overallotment option).

10

In addition, the Company expects to pay an underwriting commission of 3.5% of the per Unit price to the underwriters (an aggregate of approximately \$6,038,000), which commission was deposited in the Trust Account at the closing of the Public Offering and will be released to the underwriters only upon and concurrently with completion of the Company's initial Business Combination.

NOTE 5 – RELATED PARTY TRANSACTIONS

Founder Shares

In February 2020, the Sponsor purchased 4,312,500 shares of Class B common stock (the "Founder Shares") for \$25,000, or approximately \$0.006 per share. In July 2020, the Sponsor transferred an aggregate of 867,500 founder shares, including to the following persons: (i) 32,500 founder shares to each of Marc Saiantz and Suzy Taherian, two of the Company's independent director nominees, (ii) 35,000 founder shares to each of Neil Glat and Brian Mathis, two of the Company's independent director nominees, (iii) 40,000 founder shares to Kathleen Harris, one of the Company's independent director nominees, (iv) 50,000 founder shares to Thomas Sullivan, one of the Company's independent director nominees, (v) 67,500 founder shares to Adam Deutsch, the Company's Chief Financial Officer, (vi) 100,000 founder shares to Charlie Baynes-Reid, the Company's Chief Operating Officer, (vii) 135,000 founder shares to each of Kevin Charlton and Charles Goldman, the Company's Chief Executive Officer and director, respectively, and (viii) 200,000 founder shares to Nick Petruska, the Company's special advisor; and (ii) the Sponsor forfeited 920,000 shares of Class B common stock and certain funds and accounts managed by Magnetar Financial LLC, UBS O'Connor LLC, and Mint Tower Capital Management B.V (collectively, the "Anchor Investor") purchased 920,000 shares of Class B common stock from the Company for an aggregate purchase price of approximately \$5,333, or approximately \$0.006 per share resulting in the Company's initial stockholders holding an aggregate of 4,312,500 Founder Shares. The Founder Shares are identical to the Class A common stock included in the Units being sold in the Public Offering except that the Founder Shares automatically convert into shares of Class A common stock at the time of the initial Business Combination and are subject to certain transfer restrictions, as described in more detail below.

The Company's initial stockholders and Anchor Investors have agreed not to transfer, assign or sell any of its Founder Shares until the earlier of (A) one year after the completion of the Company's initial Business Combination, or (B), subsequent to the Company's initial Business Combination, if (x) the last sale price of the Company's Class A common stock equals or exceeds \$12.00 per share (as adjusted for stock splits, stock dividends, reorganizations, recapitalizations and the like) for any 20 trading days within any 30-trading day period commencing at least 150 days after the Company's initial Business Combination or (y) the date on which the Company completes a liquidation, merger, stock exchange or other similar transaction after the initial Business Combination that results in all of the Company's stockholders having the right to exchange their shares of Class A common stock for cash, securities or other property.

Private Placement Warrants

The Sponsor and the Anchor Investors purchased from the Company an aggregate of 5,700,000 warrants at a price of \$1.00 per warrant, a purchase price of \$5,700,000 in a private placement that occurred simultaneously with the completion of the Public Offering (the "Private Placement Warrants"), including the underwriters' full exercise of their overallotment option. Each Private Placement Warrant entitles the holder to purchase one share of Class A common stock at \$11.50 per share. A portion of the purchase price of the Private Placement Warrants was added to the proceeds from the Public Offering held in the Trust Account pending completion of the Company's initial Business Combination. The Private Placement Warrants (including the Class A common stock issuable upon exercise of the Private Placement Warrants) are not transferable, assignable or salable until 30 days after the completion of the initial Business Combination and they will be non-redeemable so long as they are held by the Sponsor or the Anchor Investors or their permitted transferees. If the Private Placement Warrants are held by someone other than the Sponsor or the Anchor Investors or their permitted transferees, the Private Placement Warrants will be redeemable by the Company and exercisable by such holders on the same basis as the warrants included in the Units being sold in the Public Offering. Otherwise, the Private Placement Warrants have terms and provisions that are identical to those of the Warrants being sold as part of the Units in the Public Offering and have no net cash settlement provisions.

If the Company does not complete a Business Combination, then the proceeds from the sale of the Private Placement Warrants will be part of the liquidating distribution to the public stockholders and the Private Placement Warrants issued to the Sponsor will expire worthless.

Registration Rights

The Company's initial stockholders and the holders of the Private Placement Warrants will be entitled to registration rights pursuant to a registration rights agreement to be signed on or before the date of the prospectus for the Public Offering. These holders will be entitled to make up to three demands, excluding short form registration demands, that the Company register such securities for sale under the Securities Act. In addition, these holders will have "piggy-back" registration rights to include their securities in other registration statements filed by the Company. The Company will bear the expenses incurred in connection with the filing of any such registration statements. There will be no penalties associated with delays in registering the securities under the proposed registration rights agreement.

Related Party Loans

In February 2020, the Sponsor agreed to loan the Company an aggregate of \$300,000 by drawdowns of not less than \$10,000 each against the issuance of an unsecured promissory note (the "Note") to cover expenses related to the Public Offering. The Note was non-interest bearing and payable promptly after the earlier of the date on which the Company consummates the Public Offering and the date on which the Company determines not to conduct the Public Offering. The Company drew down a total of approximately \$47,000 under the Note, including approximately \$3,000 for costs paid directly by the Sponsor. On August 4, 2020, the approximately \$47,000 outstanding under the Note was fully repaid in connection with the closing of the IPO.

Working Capital Loans

In order to finance transaction costs in connection with a Business Combination, the Sponsor, an affiliate of the Sponsor, or certain of the Company's officers and directors or their affiliates may, but are not obligated to, loan the Company funds as may be required ("Working Capital Loans"). If the Company completes a Business Combination, the Company would repay the Working Capital Loans out of the proceeds of the Trust Account released to the Company. Otherwise, the Working Capital Loans would be repaid only out of funds held outside the Trust Account. In the event that a Business Combination does not close, the Company may use a portion of proceeds held outside the Trust Account to repay the Working Capital Loans but no proceeds held in the Trust Account would be used to repay the Working Capital Loans. The Working Capital Loans would either be repaid upon consummation of a Business Combination, without interest, or, at the lender's discretion, up to \$1,500,000 of such Working Capital Loans may be convertible into warrants of the post Business Combination entity. The warrants would be identical to the Private Placement Warrants. Except for the foregoing, the terms of such Working Capital Loans, if any, have not been determined and no written agreements exist with respect to such loans. As of March 31, 2021 and December 31, 2020, no Working Capital Loans were outstanding.

Administrative Support Agreement

The Company has agreed to pay \$15,000 a month for office space, utilities and secretarial and administrative support to an affiliate of the Sponsor. Services commenced on the date the securities were first listed on the Nasdaq Capital Market and will terminate upon the earlier of the consummation by the Company of an initial Business Combination or the liquidation of the Company. During the three months ended March 31, 2021, approximately \$45,000 was included in general and administrative expenses for the administrative support fee.

NOTE 6 - TRUST ACCOUNT AND FAIR VALUE MEASUREMENT

The Company complies with FASB ASC 820, Fair Value Measurements, for its financial assets and liabilities that are re-measured and reported at fair value at each reporting period, and non-financial assets and liabilities that are re-measured and reported at fair value at least annually.

Upon the closing of the Public Offering and the Private Placement, a total of approximately \$172,500,000 was deposited into the Trust Account. The proceeds in the Trust Account must be invested in either U.S. government treasury bills with a maturity of 180 days or less or in money market funds meeting certain conditions under Rule 2a-7 under the Investment Company Act of 1940, as amended, and that invest solely in U.S. government treasury obligations.

12

At March 31, 2021 the proceeds of the Trust Account were invested primarily in U.S. government treasury bills maturing in May 2021 yielding interest of less than 0.1% per year. The Company classifies its U.S. government treasury bills and equivalent securities as held-to-maturity in accordance with FASB ASC 320, "Investments - Debt and Equity Securities." Held-to-maturity securities are those securities which the Company has the ability and intent to hold until maturity. Held-to-maturity U.S. government treasury bills are recorded at amortized cost on the accompanying March 31, 2021 condensed balance sheet and adjusted for the amortization of discounts.

The following table presents information about the Company's assets that are measured at fair value on a recurring basis as of March 31, 2021 and indicates the fair value hierarchy of the valuation techniques the Company utilized to determine such fair value. Since all of the Company's permitted investments at March 31, 2021 consisted of U.S. government treasury bills and money market funds that invest only in U.S. government treasury bills, fair values of its investments are determined by Level 1 inputs utilizing quoted prices (unadjusted) in active markets for identical assets or liabilities as follows:

Description	Carrying value at March 31, 2021	Gross Unrealized Holding Gains	Quoted Price Prices in Active Markets (Level 1)
Assets:			
Cash and money market funds	\$ 1,000	\$ -	\$ 1,000
U.S. government treasury bills	172,597,000	4,000	172,601,000
Total	\$ 172,598,000	\$ 4,000	\$ 172,602,000

NOTE 7 — ACCOUNTING FOR WARRANT LIABILITY

At March 31, 2021, there were 14,325,000 warrants outstanding including 8,625,000 Public Warrants and 5,700,000 Private Placement Warrants.

The Company accounts for its warrants outstanding consistent with the "Staff Statement on Accounting and Reporting Considerations for Warrants Issued by Special Purpose Acquisition Companies (the "Staff Statement") issued on April 12, 2021 by the staff (the "Staff") of the Division of Corporation Finance of the SEC. The following table presents information about the Company's warrant liabilities that are measured at fair value on a recurring basis at March 31, 2021 and indicates the fair value hierarchy of the valuation inputs the Company utilized to determine such fair value.

Description	March 31, 2021	Quoted Prices in Active Markets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Other Unobservable Inputs (Level 3)
Warrant Liabilities:				
Public Warrants	\$ 14,317,000	\$ 14,317,000	\$ —	\$ —
Private Placement Warrants	9,848,000	—	—	9,848,000
Warrant liability at March 31, 2021	<u>\$ 24,165,000</u>	<u>14,317,000</u>	<u>—</u>	<u>\$ 24,165,000</u>

The following table presents information about the Company's warrant liabilities that are measured at fair value on a recurring basis at December 31, 2020 and indicates the fair value hierarchy of the valuation inputs the Company utilized to determine such fair value.

Description	December 31, 2020	Quoted Prices in Active Markets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Other Unobservable Inputs (Level 3)
Warrant Liabilities:				
Public Warrants	\$ 12,851,000	\$ —	\$ —	\$ 12,851,000
Private Placement Warrants	\$ 8,668,000	\$ —	\$ —	\$ 8,668,000
Warrant liability at December 31, 2020	<u>\$ 21,519,000</u>	<u>—</u>	<u>—</u>	<u>\$ 21,519,000</u>

The Company utilizes a third party valuation consultant that uses a Black-Scholes-Merton approach to value the Private Placement Warrants for the reporting period ended March 31, 2021, with changes in fair value recognized in the statement of operations. The estimated fair value of the Private Placement warrant liability is determined using Level 3 inputs. Inherent in a Black-Scholes-Merton option pricing model are assumptions related to expected share-price volatility, expected life, risk-free interest rate and dividend yield. The Company estimates the volatility of its ordinary shares based on historical volatility that matches the expected remaining life of the warrants. The risk-free interest rate is based on the U.S. Treasury zero-coupon yield curve on the grant date for a maturity similar to the expected remaining life of the warrants. The expected life of the warrants is assumed to be equivalent to their remaining contractual term. The dividend rate is based on the historical rate, which the Company anticipates to remain at zero.

The warrant liabilities are not subject to qualified hedge accounting.

There were no transfers between Levels 1, 2 or 3 during the period ended March 31, 2021.

13

The following table provides quantitative information regarding Level 3 fair value measurements:

	As of March 31, 2021	As of December 31, 2020
Private Warrants:		
Term (in years)	5.0	5.0
Volatility – pre announcement	10.0%	10.0%
Volatility – post announcement	22%	30%
Risk-free rate	1.04%	0.469%
Fair value of warrants	\$ 1.73	\$ 1.52
Public Warrants:		
Simulated warrant value		\$ 1.49
Publicly-traded value		\$ 1.49

The following table presents the changes in the fair value of warrant liabilities:

	Public	Private Placement	Warrant Liabilities
Fair value measurement on December 31, 2020	\$ 12,851,000	\$ 8,668,000	\$ 21,519,000
Change in valuation inputs or other assumptions	1,466,000	1,180,000	2,646,000
Fair value as of March 31, 2021	<u>\$ 14,317,000</u>	<u>\$ 9,848,000</u>	<u>\$ 24,165,000</u>

NOTE 8 – STOCKHOLDERS' EQUITY

Common Stock

The authorized common stock of the Company is 50,000,000 shares, including 45,000,000 shares of Class A common stock, par value, \$0.0001, and 5,000,000 shares of Class B common stock, par value, \$0.0001. The Company may (depending on the terms of the Business Combination) be required to increase the authorized number of shares at the same time as its stockholders vote on the Business Combination to the extent the Company seeks stockholder approval in connection with its Business Combination. Holders of the Company's Class A and Class B common stock vote together as a single class and are entitled to one vote for each share of Class A and Class B common stock they own. At March 31, 2021 and December 31, 2020, there were 4,312,500 shares of Class B common stock issued and outstanding at both dates and there were 3,580,839 and 3,172,650 shares, respectively, of Class A common stock issued and outstanding (excluding 13,669,161 and 14,077,350 shares, respectively, subject to possible redemption).

Preferred Stock

The Company is authorized to issue 1,000,000 shares of preferred stock, par value \$0.0001, with such designations, voting and other rights and preferences as may be determined from time to time by the Company's board of directors. At March 31, 2021 and December 31, 2020, there were no shares of preferred stock issued or outstanding.

NOTE 9 – COMMITMENTS AND CONTINGENCIES

Business Combination Costs

In connection with identifying an initial Business Combination candidate and negotiating an initial Business Combination, the Company has entered into and expects to enter into additional engagement letters or agreements with various consultants, advisors, professionals and others. The services under these engagement letters and agreements are material in amount and in some instances include contingent or success fees. Contingent or success fees (but not deferred underwriting compensation) would be charged to operations in the quarter that an initial Business Combination is consummated. In most instances (except with respect to our independent registered public accounting firm), these engagement letters and agreements are expected to specifically provide that such counterparties waive their rights to seek repayment from the funds in the Trust Account.

Risks and Uncertainties – COVID-19

Management continues to evaluate the impact of the COVID-19 pandemic on the industry and has concluded that while it is reasonably possible that the virus could have a negative effect on the Company's financial position, results of its operations and/or search for a target company and/or a target company's financial position and results of its operations, the specific impact is not readily determinable as of the date of these financial statements. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis of the Company's financial condition and results of operations should be read in conjunction with the condensed financial statements and the notes thereto contained elsewhere in this report.

Special Note Regarding Forward-Looking Statements

All statements other than statements of historical fact included in this section and elsewhere in this Form 10-Q regarding the Company's financial position, business strategy and the plans and objectives of management for future operations, are forward-looking statements. When used in this Form 10-Q, words such as "anticipate," "believe," "estimate," "expect," "intend" and similar expressions, as they relate to us or the Company's management, identify forward-looking statements. Such forward-looking statements are based on the beliefs of management, as well as assumptions made by, and information currently available to, the Company's management. Actual results could differ materially from those contemplated by the forward-looking statements as a result of certain factors detailed in our filings with the SEC.

Overview

We are a blank check company incorporated on January 24, 2020 as a Delaware corporation and formed for the purpose of effecting a merger, capital stock exchange, asset acquisition, stock purchase, reorganization or similar business combination with one or more businesses (the "Initial Business Combination"). We intend to effectuate our Initial Business Combination using cash from the proceeds of our initial public offering that was completed in August 2020 (the "Public Offering") and the sale of warrants in a private placement (the "Private Placement") that occurred simultaneously with the completion of the Public Offering (the "Private Placement Warrants"), our capital stock, debt or a combination of cash, stock and debt.

The issuance of additional shares of our stock in an Initial Business Combination:

- may significantly dilute the equity interest of our stockholders;
- may subordinate the rights of holders of our common stock if preferred stock is issued with rights senior to those afforded our common stock;
- could cause a change in control if a substantial number of shares of our common stock is issued, which may affect, among other things, our ability to use our net operating loss carry forwards, if any, and could result in the resignation or removal of our present officers and directors;
- may have the effect of delaying or preventing a change of control of us by diluting the stock ownership or voting rights of a person seeking to obtain control of us; and
- may adversely affect prevailing market prices for our Class A common stock and/or warrants.

Similarly, if we issue debt securities or incur other indebtedness to finance our Initial Business Combination, it could result in:

- default and foreclosure on our assets if our operating revenues after an Initial Business Combination are insufficient to repay our debt obligations;
- acceleration of our obligations to repay the indebtedness even if we make all principal and interest payments when due if we breach certain covenants that require the maintenance of certain financial ratios or reserves without a waiver or renegotiation of that covenant;
- our immediate payment of all principal and accrued interest, if any, if the debt security is payable on demand;
- our inability to obtain necessary additional financing if the debt security or other indebtedness contains covenants restricting our ability to obtain such financing while the debt security or other indebtedness is outstanding;
- our inability to pay dividends on our common stock;
- using a substantial portion of our cash flow to pay principal and interest on our debt, which will reduce the funds available for dividends on our common stock if declared, or limit our ability to pay expenses, make capital expenditures and acquisitions and fund other general corporate purposes;

- limitations on our flexibility in planning for and reacting to changes in our business and in the industry in which we operate;
- increased vulnerability to adverse changes in general economic, industry and competitive conditions and adverse changes in government regulation;

- limitations on our ability to borrow additional amounts for expenses, capital expenditures, acquisitions, debt service requirements, execution of our strategy and other purposes and
- other disadvantages compared to our competitors who have less debt.

At March 31, 2021, we had approximately \$579,000 in cash outside of the Trust Account. We expect to incur significant costs in the pursuit of an Initial Business Combination and we cannot assure you that our plans to complete an Initial Business Combination will be successful.

Recent Developments – COVID-19

The COVID-19 pandemic has resulted in a widespread health crisis that has adversely affected the economies and financial markets worldwide. The business of any potential target business with which we consummate a business combination could be materially and adversely affected. Furthermore, we may be unable to complete a business combination if continued concerns relating to COVID-19 restrict travel, limit the ability to have meetings with potential investors or the target company's personnel, vendors and services providers are unavailable to negotiate and consummate a transaction in a timely manner. The extent to which COVID-19 impacts our ability to consummate a business combination will depend on future developments, which are highly uncertain and cannot be predicted, including new information which may emerge concerning the severity of COVID-19 and the actions to contain COVID-19 or treat its impact, among others. If the disruptions posed by COVID-19 or other matters of global concern continue for an extended period of time, our ability to consummate a business combination, or the operations of a target business with which we ultimately consummate a business combination, may be materially adversely affected, however, the specific impact is not readily determinable as of the date of this report.

Recent Developments – Merger Agreement

On March 5, 2021, NewHold Investment Corp., (the "Company"), entered into an Agreement and Plan of Merger (the "Merger Agreement") by and among the Company, NHIC Sub Inc., a Delaware corporation and a wholly owned subsidiary of the Company ("Merger Sub"), and Evolv Technologies, Inc. dba Evolv Technology, Inc., a Delaware corporation ("Evolv"). Pursuant to the terms of the Merger Agreement, a business combination between the Company and Evolv will be effected through the merger of Merger Sub with and into Evolv, with Evolv surviving the merger as a wholly owned subsidiary of the Company (the "Merger"). The Board of Directors of the Company (the "Board") has unanimously (i) approved and declared advisable the Merger Agreement, the Merger and the other transactions contemplated thereby and (ii) resolved to recommend approval of the Merger Agreement and related matters by the stockholders of the Company.

Evolv is engaged in the business of providing artificial intelligence touchless security screening. Evolv is based in Waltham, Massachusetts.

More complete information about the Merger Agreement and related Support Agreement, Amended and Restated Insider Letter Agreement, form of Subscription Agreement and Stockholder Agreement are filed with the Current Report on Form 8-K filed on March 8, 2021.

Results of Operations and Known Trends or Future Events

For the period from January 24, 2020 (date of inception) to March 31, 2021 our activities consisted of formation and preparation for the Public Offering and, subsequent to the Public Offering, identifying and completing a suitable Initial Business Combination. As such, we had no operations or significant operating expenses until August 2020.

Our normal operating costs include costs associated with our search for an Initial Business Combination, costs associated with our governance and public reporting and state franchise taxes expected to total approximately \$17,000 per month (see below), a charge of \$15,000 per month from our Sponsor for administrative services. Our costs in the three months ended March 31, 2021 also include the costs of our public reporting, governance and related costs, subsequent to the Public Offering as well as professional and consulting fees and travel associated with evaluating various Initial Business Combination candidates. Costs associated with our governance and public reporting have increased since the Public Offering and were approximately \$85,000 for the three months ended March 31, 2021. Costs associated with professional, due diligence and consulting fees related to our review of business combination candidates were approximately \$1,155,000 for the three months ended March 31, 2021. As we identify Initial Business Combination candidates, our costs are expected to increase significantly in connection with negotiating and executing a definitive agreement and related agreements as well as additional professional, due diligence and consulting fees and travel costs that will be required in connection with an Initial Business Combination. We expect our costs to increase significantly in connection with negotiating and executing a merger agreement and related agreements as well as additional professional, due diligence and consulting fees and travel costs that will be required in connection with an Initial Business Combination.

Since our operating costs are not expected to be deductible for federal income tax purposes, we are subject to federal income taxes on the income from the Trust Account less taxes. However, we are permitted to withdraw interest earned from the Trust Account for the payment of taxes.

Our Public Offering and Private Placement closed in August 2020 as more fully described in "Liquidity and Capital Resources" below. The proceeds in the Trust Account were initially invested in a money market fund that invests solely in direct U.S. government obligations meeting the applicable conditions of Rule 2a-7 of the Investment Company Act of 1940. In August 2020, the money market fund was largely liquidated and the trust assets were invested in U.S. government treasury bills which matured in February 2021 and were replaced with U.S. government treasury bills maturing in May 2021. The Company's U.S. treasury bills yield approximately 0.1% on a yearly basis. Interest on the Trust Account was approximately \$19,000 for the three months ended March 31, 2021. At the interest rate earned on the current portfolio in the trust account, it is unlikely that the income on the trust assets will be sufficient to fund the tax and working capital payments that are permitted to be withdrawn from the trust.

As discussed further in Note 6 to the condensed financial statements, the Company accounts for its outstanding public and private warrants as components as derivative liabilities in the accompanying unaudited condensed financial statements. As a result, the Company is required to measure the fair value of the public and private warrants at the end of each reporting period and recognize changes in the fair value from the prior period in the Company's operating results for each current period. The statement of operations for the three months ended March 31, 2021 reflects other expense from change in fair value of the warrant liability of approximately \$2,646,000.

Liquidity and Capital Resources

In August 2020, we consummated the Public Offering of an aggregate of 17,250,000 Units (including the full exercise of the underwriters' overallotment option) at a price of \$10.00 per unit generating gross proceeds of approximately \$172,500,000 before underwriting discounts and expenses. Simultaneously with the consummation of the Public Offering, we consummated the Private Placement of 5,700,000 Private Placement Warrants, each exercisable to purchase one share of our Class A common stock at \$11.50 per share, to the Sponsor and the Anchor Investor, at a price of \$1.00 per Private Placement Warrant, generating gross proceeds, before expenses, of approximately \$5,700,000.

The net proceeds from the Public Offering and Private Placement was approximately \$174,256,000, net of the non-deferred portion of the underwriting commissions of \$3,450,000 and offering costs and other expenses of approximately \$494,000. \$172,500,000 of the proceeds of the Public Offering and the Private Placement have been deposited in the Trust Account and are not available to us for operations (except for withdrawal of interest amounts, if available, to pay taxes and \$250,000 per year in working capital). At March 31, 2021, we had approximately \$579,000 of cash available outside of the Trust Account to fund our activities until we consummate an Initial Business Combination. In addition, we are permitted to withdraw cash from interest earned on the trust account for payment of taxes and for up to \$250,000 of working capital.

Until the consummation of the Public Offering, the Company's only sources of liquidity were an initial purchase of shares of our common stock for approximately \$30,000 by the Sponsor and the Anchor Investor, and a total of \$47,000 loaned by the Sponsor against the issuance of an unsecured promissory note (the "Note"). The Note was non-interest bearing and was paid in full on August 2020 in connection with the closing of the Public Offering.

For the three months ended March 31, 2021, cash used in operating activities was approximately \$749,000. Net loss of approximately \$4,082,000 was affected by other expense for the change in the fair value of the warrant liability of \$2,646,000 as well as income earned on investments held in the Trust Account of approximately \$19,000. Changes in operating assets and liabilities provided approximately \$706,000 of cash for operating activities.

The Company believes that it has sufficient working capital available to it at March 31, 2021 to fund its operations for at least the next twelve months.

The Company has until August 4, 2022 to complete an Initial Business Combination. If the Company does not complete an Initial Business Combination by August 4, 2022, the Company will (i) cease all operations except for the purposes of winding up; (ii) as promptly as reasonably possible, but not more than ten business days thereafter, redeem the public shares for a per share price equal to a pro rata portion of the Trust Account, including interest, but less taxes payable (and less up to \$100,000 of interest to pay dissolution expenses) and (iii) as promptly as reasonably possible following such redemption, dissolve and liquidate the balance of the Company's net assets to its creditors and remaining stockholders, as part of its plan of dissolution and liquidation. The initial stockholders have waived their redemption rights with respect to their founder shares; however, if the initial stockholders or any of their affiliates acquire shares of Class A common stock in or after the Public Offering, they will be entitled to a pro rata share of the Trust Account upon the Company's redemption or liquidation in the event the Company does not complete an Initial Business Combination within the required time period.

In the event of such liquidation, it is possible that the per share value of the residual assets remaining available for distribution (including Trust Account assets) will be less than the price per unit in the Public Offering. At the interest rate earned on the current portfolio in the trust account, it is unlikely that the income on the trust assets will be sufficient to fund the tax and working capital payments that are permitted from the trust.

Off-balance sheet financing arrangements

We have no obligations, assets or liabilities which would be considered off-balance sheet arrangements. We do not participate in transactions that create relationships with unconsolidated entities or financial partnerships, often referred to as variable interest entities, which would have been established for the purpose of facilitating off-balance sheet arrangements.

We have not entered into any off-balance sheet financing arrangements, established any special purpose entities, guaranteed any debt or commitments of other entities, or entered into any agreements for non-financial assets.

Contractual obligations

At March 31, 2021, we did not have any long-term debt, capital lease obligations, operating lease obligations or long-term liabilities. In connection with the Public Offering, we entered into an Administrative Support Agreement with an affiliate of our Sponsor, pursuant to which the Company pays that affiliate \$15,000 per month for office space, utilities and secretarial and administrative support.

Upon completion of the Initial Business Combination or the Company's liquidation, the Company will cease paying or accruing these monthly fees.

In connection with identifying an Initial Business Combination candidate, the Company expects to enter into engagement letters or agreements with various consultants, advisors, professionals and others in connection with an Initial Business Combination. The services under these engagement letters and agreements are likely to be material in amount and in some instances include contingent or success fees. Contingent or success fees (but not deferred underwriting compensation) would be charged to operations in the quarter that an Initial Business Combination is consummated. In most instances (except with respect to our independent registered public accounting firm), these engagement letters and agreements are expected to specifically provide that such counterparties waive their rights to seek repayment from the funds in the Trust Account.

Critical Accounting Policies

The preparation of financial statements and related disclosures in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements, and income and expenses during the periods reported. Actual results could materially differ from those estimates. The Company has identified the following as its critical accounting policies:

Emerging Growth Company

Section 102(b)(1) of the JOBS Act exempts emerging growth companies from being required to comply with new or revised financial accounting standards until private companies (that is, those that have not had a Securities Act registration statement declared effective or do not have a class of securities registered under the Exchange Act) are required to comply with the new or revised financial accounting standards. The JOBS Act provides that a company can elect to opt out of the extended transition period and comply with the requirements that apply to non-emerging growth companies but any such an election to opt out is irrevocable. The Company has elected not to opt out of such extended transition period which means that when an accounting standard is issued or revised and it has different application dates for public or private companies, the Company, as an emerging growth company, can adopt the new or revised standard at the time private companies adopt the new or revised standard. This may make comparison of the Company's financial statements with another public company which is neither an emerging growth company nor an emerging growth company which has opted out of using the extended transition period difficult or impossible because of the potential differences in accounting standards used.

Deferred Offering Costs:

The Company complies with the requirements of the FASB ASC 340-10-S99-1 and SEC Staff Accounting Bulletin (SAB) Topic 5A — "Expenses of Offering". Costs incurred in connection with preparation for the Offering were approximately \$9,981,000 including underwriters' discount paid and deferred of \$9,488,000. Such costs were allocated among the equity and warrant liability components based on the relative fair value of the warrants and approximately \$9,596,000 has been charged to equity for the equity components and approximately \$390,000 has been charged to other expense for the warrant liability components upon completion of the Public Offering.

Redeemable Common Stock:

As discussed in Note 3, all of the 17,250,000 public shares sold as part of Units in the Public Offering contain a redemption feature which allows for the redemption of

public shares if the Company holds a stockholder vote or there is a tender offer for shares in connection with a Business Combination. In accordance with FASB ASC 480, redemption provisions not solely within the control of the Company require the security to be classified outside of permanent equity. Ordinary liquidation events, which involve the redemption and liquidation of all of the entity's equity instruments, are excluded from the provisions of FASB ASC 480. Although the Company did not specify a maximum redemption threshold, its charter provides that in no event will it redeem its public shares in an amount that would cause its net tangible assets (stockholders' equity) to be less than \$5,000,001 upon the closing of a Business Combination.

The Company recognizes changes in redemption value immediately as they occur and adjusts the carrying value of the securities at the end of each reporting period. Increases or decreases in the carrying amount of redeemable common stock are affected by adjustments to additional paid-in capital. Accordingly, at March 31, 2021 and December 31 2020, 13,669,161 and 14,077,350 shares, respectively, of the 17,250,000 public shares were classified outside of permanent equity.

Net Income (Loss) per Share

Net income (loss) per common share is computed by dividing net income (loss) applicable to common stockholders by the weighted average number of shares of common stock outstanding for the period. The Company has not considered the effect of the warrants sold in the Public Offering and Private Placement to purchase an aggregate of 14,325,000 shares of Class A common stock in the calculation of diluted income (loss) per share, since their inclusion would be anti-dilutive under the treasury stock method. As a result, diluted income (loss) per common share is the same as basic loss per common share for the period.

19

The Company's statement of operations includes a presentation of income (loss) per share for common stock subject to redemption in a manner similar to the two-class method of income (loss) per share. Net income (loss) per share, basic and diluted for Class A common stock is calculated by dividing the interest income earned on the funds in the Trust Account, net of income tax expense and franchise tax expense, by the weighted average number of shares of Class A common stock outstanding since their original issuance. Net income (loss) per common share, basic and diluted, for shares of Class B common stock is calculated by dividing the net income (loss), less income attributable to Class A common stock, by the weighted average number of shares of Class B common stock outstanding for the period. Net income (loss) available to each class of common stockholders is as follows for the three months ended March 31, 2021 and for the period from January 24, 2020 (date of inception) to March 31, 2021:

	Three months Ended March 31, 2021	For the Period From January 24, 2020 (date of inception) to March 31, 2020
Net income available to Class A common stockholders:		
Interest income	\$ 19,000	\$ -
Less: Income and franchise taxes	(19,000)	-
Net income attributable to Class A common stockholders	<u>\$ -</u>	<u>\$ -</u>
Net income available to Class B common stockholders:		
Net loss	\$ (4,082,000)	\$ (2,000)
Less: amount attributable to Class A common stockholders	-	-
Net (loss) attributable to Class B common stockholders	<u>\$ (4,082,000)</u>	<u>\$ (2,000)</u>

Income Taxes:

The Company follows the asset and liability method of accounting for income taxes under FASB ASC, 740, "Income Taxes." Deferred tax assets and liabilities are recognized for the estimated future tax consequences attributable to differences between the financial statements carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that included the enactment date. Valuation allowances are established, when necessary, to reduce deferred tax assets to the amount expected to be realized.

The Company's currently taxable income consists of interest income on the Trust Account net of taxes. The Company's general and administrative costs are generally considered start-up costs and are not currently deductible. During the three months ended March 31, 2021 and the period from January 24, 2020 (date of inception) to March 31, 2020, the Company recorded income tax expense of approximately \$-0- in both periods, respectively, related to interest income earned on the Trust Account net of taxes. The Company's effective tax rate for the three months ended March 31, 2021 and the period from January 24, 2020 (date of inception) to March 31, 2020 was approximately -0-% in both periods which differs from the expected income tax rate due to the start-up costs (discussed above) which are not currently deductible, as well as business combination and warrant liability costs or credits which may not be deductible and the low level of interest income. At March 31, 2021 and December 31, 2020, the Company has a deferred tax asset of approximately \$550,000 and \$200,000, respectively, primarily related to start-up and Business Combination costs. Management has determined that a full valuation allowance of the deferred tax asset is appropriate at this time.

FASB ASC 740 prescribes a recognition threshold and a measurement attribute for the financial statement recognition and measurement of tax positions taken or expected to be taken in a tax return. For those benefits to be recognized, a tax position must be more-likely-than-not to be sustained upon examination by taxing authorities. There were no unrecognized tax benefits as of March 31, 2021. The Company recognizes accrued interest and penalties related to unrecognized tax benefits as income tax expense. No amounts were accrued for the payment of interest and penalties at March 31, 2021. The Company is currently not aware of any issues under review that could result in significant payments, accruals or material deviation from its position. The Company is subject to income tax examinations by major taxing authorities since inception.

Warrant Liability

The Company accounts for warrants as either equity-classified or liability-classified instruments based on an assessment of the warrant's specific terms and applicable authoritative guidance FASB ASC 480, Distinguishing Liabilities from Equity ("ASC 480") and ASC 815, Derivatives and Hedging ("ASC 815"). The assessment considers whether the warrants are freestanding financial instruments pursuant to ASC 480, meet the definition of a liability pursuant to ASC 480, and whether the warrants meet all of the requirements for equity classification under ASC 815, including whether the warrants are indexed to the Company's own shares, among other conditions for equity classification. This assessment, which requires the use of professional judgment, is conducted at the time of warrant issuance and as of each subsequent quarterly period end date while the warrants are outstanding.

20

For issued or modified warrants that meet all of the criteria for equity classification, the warrants are required to be recorded as a component of additional paid-in capital at the time of issuance. For issued or modified warrants that do not meet all the criteria for equity classification, the warrants are required to be recorded as liabilities at their initial fair value on the date of issuance, and at fair value in each balance sheet date thereafter. Changes in the estimated fair value of the warrants are recognized as a non-cash gain or loss on the statements of operations. Costs associated with issuing the warrants accounted for as liabilities are charged to operations when the warrants are issued. The fair value of the public warrants and the private placement warrants were initially estimated using a Monte Carlo simulation approach. Following the separate trading of the Company's common stock and public warrants, the private placement warrants fair values were estimated using a Black-Scholes-Merton approach.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We were incorporated in Delaware on January 24, 2020 for the purpose of effecting an Initial Business Combination. As of March 31, 2021, we had not commenced any operations or generated any revenues. All activity through March 31, 2021 relates to our formation and our Public Offering and subsequent to the Public Offering identifying and completing a suitable Initial Business Combination. \$172,500,000 of the net proceeds of the Public Offering and the Private Placement that closed in August 2020 were deposited into a Trust Account that invests solely in U.S. government treasury bills with a maturity of 180 days or less or in money market funds meeting certain conditions under Rule 2a-7 under the Investment Company Act of 1940 which invest only in direct U. S. government obligations. In August 2020, the money market fund was largely liquidated and the trust assets were invested in U.S. government treasury bills which mature in February 2020 and currently yield approximately 0.1% on a yearly basis. At March 31, 2021, there was approximately \$172,598,000 in the Trust Account.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Disclosure controls and procedures are controls and other procedures that are designed to ensure that information required to be disclosed in our reports filed or submitted under the Securities Exchange Act of 1934, as amended (the "Exchange Act"), is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed in company reports filed or submitted under the Exchange Act is accumulated and communicated to management, including our Chief Executive Officer and Chief Financial Officer, to allow timely decisions regarding required disclosure.

On April 12, 2021, the SEC issued a Staff Statement on Accounting and Reporting Considerations for Warrants Issued by Special Purpose Acquisition Companies ("SPAC's"), the "Statement." In the Statement, the SEC indicates its view that certain terms of the warrants issued in connection with a SPAC Initial Public Offering ("Public Warrants") and private placement warrants typically issued by a SPAC ("Private Warrants") call for such warrants to be accounted for as liabilities and not as equity. The Company has recorded such warrants as equity. This determination (liability vs. equity) has caused the Company to restate previously issued financial statements that showed the warrants as equity. Therefore, our management concluded that we did not maintain effective internal control over financial reporting as of March 31, 2021, December 31, 2020 and September 30, 2020, due to a material weakness in our internal control over financial reporting related to a lack of an effectively designed control over the evaluation of settlement features used to determine the classification of warrant instruments. The need to restate financial statements in this instance constitutes a material weakness in internal control.

In light of this material weakness at March 31, 2021, December 31, 2020 and September 30, 2020, we modified our procedures to include employing consultants on valuation and specialized knowledge on warrant accounting and we performed additional analysis as deemed necessary to ensure that our financial statements at March 31, 2021 were prepared in accordance with U.S. generally accepted accounting principles. Accordingly, management believes that the financial statements included in this Quarterly Report on Form 10-Q present fairly in all material respects our financial position, results of operations and cash flows for the period presented.

As required by Rules 13a-15 and 15d-15 under the Exchange Act, our Chief Executive Officer and Chief Financial Officer carried out an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures as of March 31, 2021. Based upon their evaluation, including the discussion in the previous paragraph, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) were not effective as of March 31, 2021.

Changes in Internal Control over Financial Reporting

During the three months ended March 31, 2021, there has been no change in our internal control over financial reporting that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting except as described below.

In light of the restatement of the previously filed financial statements, we are enhancing our processes to identify and appropriately apply applicable accounting requirements to better evaluate and understand the nuances of the complex accounting standards that apply to our financial statements. Our plans at this time include retaining consultants with technical accounting expertise in derivatives accounting as well as valuation consultants with expertise in warrants and other derivative instruments. We believe our efforts will enhance our controls relating to warrant accounting, but we can offer no assurance that our controls will not require additional review and modification in the future as industry accounting practices based on the SEC Statement may evolve over time.

PART II — OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

None.

ITEM 1A. RISK FACTORS

As of the date of this Quarterly Report on Form 10-Q, there have been no material changes to the risk factors disclosed in our Prospectus filed with the SEC on July 28, 2020 or our Annual Report, as amended on Form 10-K/A filed on May 14, 2021. Any of these factors could result in a significant or material adverse effect on our results of operations or financial condition. Additional risk factors not presently known to us or that we currently deem immaterial may also impair our business or results of operations. We may disclose changes to such risk factors or disclose additional risk factors from time to time in our future filings with the SEC.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

None

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

None.

ITEM 4. MINE SAFETY DISCLOSURES

None.

ITEM 5. OTHER INFORMATION

None.

CERTIFICATION OF PRINCIPAL EXECUTIVE OFFICER

Pursuant to Rule 13a-14(a) and Rule 15d-14(a) under the
Securities Exchange Act of 1934
(Section 302 of the Sarbanes-Oxley Act of 2002)

I, Kevin Charlton, certify that:

1. I have reviewed this Quarterly Report on Form 10-Q of NewHold Investment Corp.;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) for the registrant and have:

a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

b) [omitted pursuant to the transition period exemption for newly public companies.]

c) evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

d) disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

CERTIFICATION OF PRINCIPAL EXECUTIVE OFFICER

Pursuant to 18 U.S.C. 1350

(Section 906 of the Sarbanes-Oxley Act of 2002)

In connection with the Quarterly Report on Form 10-Q of NewHold Investment Corp. (the "Company") for the quarter ended March 31, 2021, as filed with the Securities and Exchange Commission (the "Report"), I, Kevin Charlton, Chief Executive Officer of the Company, hereby certify, pursuant to 18 U.S.C. §1350, as adopted pursuant to §906 of the Sarbanes-Oxley Act of 2002, that:

- (1) The Report fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934, as amended; and
- (2) The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Company.
